

"What If a Chiropractor Could Relieve Your Neck & Back Pain with No Popping or Twisting?"

...And Didn't Want You To Keep Coming Forever!

July 1st, 2019
Bellevue, Washington

Dear Friends,

If you suffer from pain and you've considered seeing a chiropractor, this could be the most eye-opening article you'll ever read.

Imagine for a moment that it's 6 months from today...

You're enjoying what you love to do: playing golf, playing with the kids, or maybe just laying on a beach somewhere.

You're free from the issues that were holding you back. You have more energy, better health, and absolutely no pain.

Does this sound too good to be true – to live pain free, like you were in your younger years?

In a minute I'll tell you how you can make this a reality. But first you should know a little about me.

My name is Dr. Matt Dunn and I chose to start my practice in Bellevue because I absolutely loved the town and the people.

For the past 10+ years, I've used gentle chiropractic treatments to help thousands of patients feel better and live healthier, more productive lives.

"Does Chiropractic Really Work?"

Chiropractic has been around for over a hundred years, and has been used to help everyone from small children to the elderly. Elite athletes and the most famous stars & entertainers have praised chiropractic care.

In fact, the U.S. government is so convinced that chiropractic works they've been paying for it through the Medicare system for 30 years.

In addition to that, here's what some of the top medical researchers had to say about chiropractic:

"Manipulation [chiropractic adjustments], with or without exercise, improved symptoms more than medical care did after both 3 and 12 months"

– British Medical Journal

"Chiropractor's manipulation of the spine was more helpful than any of the following: massage, acupuncture, and steroid injections."

– Stanley Bigos, MD
Professor of Orthopedic Surgery

"Isn't Chiropractic Just For Neck & Back Pain?"

I also treat patients for conditions like:

- Sciatica
- Herniated Discs
- Headaches & Migraines
- Carpal Tunnel Syndrome
- Numbness in arms & legs
- Whiplash Injuries
- Peripheral Neuropathy
- Shoulder, Hip and Knee Pain

"Are You Going to Crack My Neck?"

Chiropractic, like medicine, has come a long way since it was discovered over 114 years ago. We've developed many new techniques throughout the years. Going to a chiropractor today is a lot different than it would have been even 10 or 15 years ago.

In my office, I use a modern technique that involves NO popping or twisting! I use an electric instrument that gently adjusts the spine back into place.

I hear almost every day from my patients how they find this type of treatment much more comfortable than the "old" style of adjustments. Plus they love the results they're getting!

"Do I Have To Come For The Rest Of My Life?"

To be honest, I'm not sure where this even comes from, but I'm asked this so often that I'll address it right now.

I can't speak for what other doctors do in their offices, but in my office I want a permanent solution for you. I'm looking to get you out of pain and back to the life that you deserve... as quickly as possible.

Some folks are treated in my office for only a few visits and then they're done. Some problems may take a little longer to correct, sometimes weeks or months. But that's it... then you're done.

"How Much Does Chiropractic Cost?"

It's impossible to know for sure what you'll need to get rid of your nagging pain until I've examined you. That's why for the month of July, \$45 will get you all the services that I normally charge new patients \$160 for!

What does this offer include? Everything that I normally do in my new patient evaluation. Take a look at what you'll receive:

1) An in-depth consultation about your pain where I'll listen... really listen.

2) A comprehensive nerve, muscle and spinal exam to root out the cause of your pain.

3) A thorough analysis of your exam findings so that we can map out your plan to better health.

I'll answer any questions that you have about chiropractic and what it can do for you. The appointment won't take long at all and you won't be sitting around in a waiting room all day.

To take me up on this special offer, you must come in before July 30th

You can schedule your evaluation online at my real-time scheduling website: www.DrDunnSchedule.com or you can call 425-243-7658.

I'm located in the Karman Executive Center at 40 Lake Bellevue Drive in Bellevue. When you enter, Jan or Sandina will greet you at the front desk and direct you to where you need to go.

Sincerely,

Dr. Matt Dunn

Dr. Matt Dunn

P.S. You've got enough people trying to waste your time with risky and expensive treatments. I'm not one of those people.

What I offer here is something quite different.

P.P.S. Why Suffer Years of Misery?

The big myth about back pain is that "maybe it will just go away on its own."

A study in the British Medical Journal proved this myth false, showing that most back pain sufferers who do nothing will still have pain 12 months later.

That's no way to live, not when there could be an easy solution to your problem.

Lake Bellevue
CHIROPRACTIC

Dr. Dunn has been a Chiropractic Physician since 2008. During that time, he's delivered over 50,000 patient visits. He's also a Registered Nurse and EMT. This unique blend of skills allows him to treat a broad range of chiropractic and medical issues.
